COLORS fix later	Fix me
<b>F9 → o → l</b>	Open color selection dialog box.

Shortcut	Description
<b>F11 + Temporary Panel</b>	Create and switch to a Temporary Panel. You can copy/drag files and folders from the visible Panel to it. This allows to work on multiple items from different locations at the same time.
Filter what is shown in the Panel	
<b>Ctrl + i</b>	<p>Open Filter dialog menu. It contains all file types/extensions seen in the current folder. By moving with <i>Arrow Up/Down</i> you can select/deselect any single or combination of multiple extensions to include or exclude in the display. Highlight the extension in question and press:</p> <ul style="list-style-type: none"> <li>• <b>&lt;space&gt;</b> or <b>+</b> or <b>i</b>: Include files with such extension in the display, exclude from display anything else. Pressing the same key again clears the selection.</li> <li>• <b>Shift + Backspace</b>: Clear all selections made so far.</li> <li>• <b>x</b>: Exclude the selected extensions from showing, show what is left.</li> <li>• <b>Insert</b>: Open a dialog menu to create Custom filter. This allows to include/exclude files by their name, size, attributes, and modification date. You can use relative operators <b>&gt;=</b>, <b>,</b>, <b>=</b>. All operands in Custom filter are ANDed. Make sure to activate this Custom filter with Space or <b>+</b> in the filter list later.</li> </ul> <p>-</p>
