Rotate images 90 degrees

Use **convert** tools in a bash script to rotate all .jpg images in the current folder, naming the rotated images as *current-name-rotated.jpg*

```
for ii in *.jpg
do
convert ${ii} -rotate 90 ${ii}-rotated.jpg
done
```

Combine images in the current folder into a PDF file

Let's combine images with extension .jpg (using shell wildcards) into one PDF file.

```
magick *.jpg pics-2022-1.pdf
```
