| command | Description |
|---|---|
| Contribute to a project (pull request/PR) on Github.com | Steps to contribute to some project on the github: |
| | 1. Fork the project you want to contribute to. |
| | 2. Clone the fork to your local system. |
| | 3. Make a new custom (non-master) branch inside it. |
| | 4. Make your changes. |
| | 5. Push this branch to your Github account. |
| | 6. Open a Pull Request on the Github.com for the project owner to review & merge. |
